SKILL LEVEL AND PLAYERS NAME

- If you are the Home team write in all 5 players names under home team, if you are the visiting team write in all 5 players names under visiting team, add the player's skill level under skill, and add all 5 players skill levels up and write it to the left of score per round. After both teams have their lineups filled out exchange paperwork and write your opponent's players onto your paperwork, then subtract the smaller total team skill level from the larger team skill level to get your handicap bonus then write it down for all 5 rounds of play.
- Note there is a 32 soft cap for team skill totals if your team goes over the soft cap you have to give your opponents 2 points for each number over the 32. you give one point for each point up until a team goes over the soft cap.
